To Friends of the Keystone Science School

For many years Nancy and I have watched the Keystone Science School become more and more successful in helping young people and their teachers better understand the environment, the scientific method, working collaboratively, and much else. The future of our nation lies in the hands of these young people who have gained knowledge and tools at the Keystone Science School.

A major event for KSS was the separation from Keystone Center. We all worked hard to raise the funds necessary to make this happen. That event was clearly of tremendous importance to the future of KSS.

Now KSS has started an Endowment Fund. The purpose of the Fund is to provide a financial cushion that can offset ups and downs that may occur in annual revenues. A solid endowment fund is a source of stability as well as a guarantee to donors and users that KSS will be around for a long time to come.

Nancy and I are donating \$50,000 to the KSS Endowment Fund this year.

We invite you to join us in building the core foundation of the KSS Endowment Fund.

I have been involved with the start-up of the Summit County Rotary Endowment Fund and the National Repertory Orchestra Endowment Fund. Once started, these two endowment funds have grown steadily to well over one million dollars each. They began small but now represent a substantial financial foundation for these two organizations.

Nancy and I want to see the same beginning, then growth, for the Keystone Science School Endowment Fund.

Please join us with your donation to the Keystone Science School Endowment Fund.

There are many ways to give. Of course, cash is the most common. But appreciated stock or other assets are also welcome. For the long-term, the Fund can be named in a will, in an insurance policy, or in other estate planning vehicles.

Thanks for your continuing support of the Keystone Science School!

Best Wishes,

Bob Follett
